

# ***TOMALES BAY STATE PARK***

## ***GENERAL PLAN***

***Half a Century of Resource Preservation and Public Enjoyment***

**GENERAL PLAN SURVEY #1**

**SEPTEMBER 2002**

California State Parks is preparing a general plan for Tomales Bay State Park. This planning effort will establish a long-range vision for the park and recommend how to protect and improve the park's natural, cultural, and recreational values on both sides of the bay. This 18-month planning process will include opportunities for public input during the preparation of alternatives and the preliminary plan and during the State Parks Commission Hearing.

General public involvement opportunities will be advertised in the local media and on the Internet at [www.parks.ca.gov](http://www.parks.ca.gov) (click "General Plans" and then "General Plans in Progress"). Updates on the plan will be made through information posted on the park's planning Web page and through mailed newsletters.

***Please send us your ideas about the park!***

**When I visit Tomales Bay State Park I now enjoy and want to preserve:**
